Download a free version of the script of Super Stereo 3.0[...]The Milwaukee Brewers are currently in St. Louis for the start of a three-game series against the Cardinals. As the Brewers take on the Cardinals, team spokesman David DeCastro released a statement saying that the team is aware of a reported incident that involved a fan and a bat on Saturday night, but does not expect to issue any disciplinary action. DeCastro says the incident happened on the upper deck at Busch Stadium, but there are no details available. The Brewers, who are in St. Louis, were supposed to play the Cardinals on Saturday night. The Cardinals entered Saturday with a major league-best 22-9 record and were 3.5 games ahead of the Brewers in the National League Central standings. The invention relates to an apparatus for measuring a flow speed of fluid in an absorber. In particular, it relates to an apparatus for measuring the flow speed of fluid in a double-absorbent bed chemical reactor. On an industrial scale, it is necessary to be able to measure the flow speed of the fluid in an absorber or reactor. Flow speed is also used to indicate the degree of pressure to which the absorber or reactor is subjected. For reasons of safety, the degree of pressure should not be too high. The flow speed of the fluid can also be used to control the gas flow through the absorber or reactor. For this purpose, there must be a flow sensor which measures the flow speed of the fluid. In addition, a separate flow sensor can be used to measure the flow speed of a second fluid through the absorber or reactor. Flow sensors are known in the prior art, but the known flow sensors are generally expensive. In the prior art, flow sensors are used to measure a flow speed of fluid through a reactor. Flow speed is used to determine the degree of pressure to which the reactor is subjected. For safety reasons, the degree of pressure should not be too high. Flow sensors are also used to measure a flow speed of fluid through a reactor. Flow sensors are also used to measure a flow speed of a second fluid through the reactor. 82157476af
